

CYBOP Schema
(Tree Structure)

The diagram is a 4-layer pyramid on a blue background. The top layer is a small blue hexagonal prism labeled 'CYBOP Schema (Tree Structure)'. The second layer is a larger brown hexagonal prism with an orange side, labeled 'High-Level Language (Complex Instructions)'. The third layer is a large light blue hexagonal prism with a white side, labeled 'Assembler (Instruction Set Symbolic Names)'. The bottom layer is the largest, a dark blue hexagonal prism with a grey side, labeled 'Machine Language (Processor Instruction Set)'.

High-Level Language

`.app.domain.address`

Uniform Syntax for Data and Functions

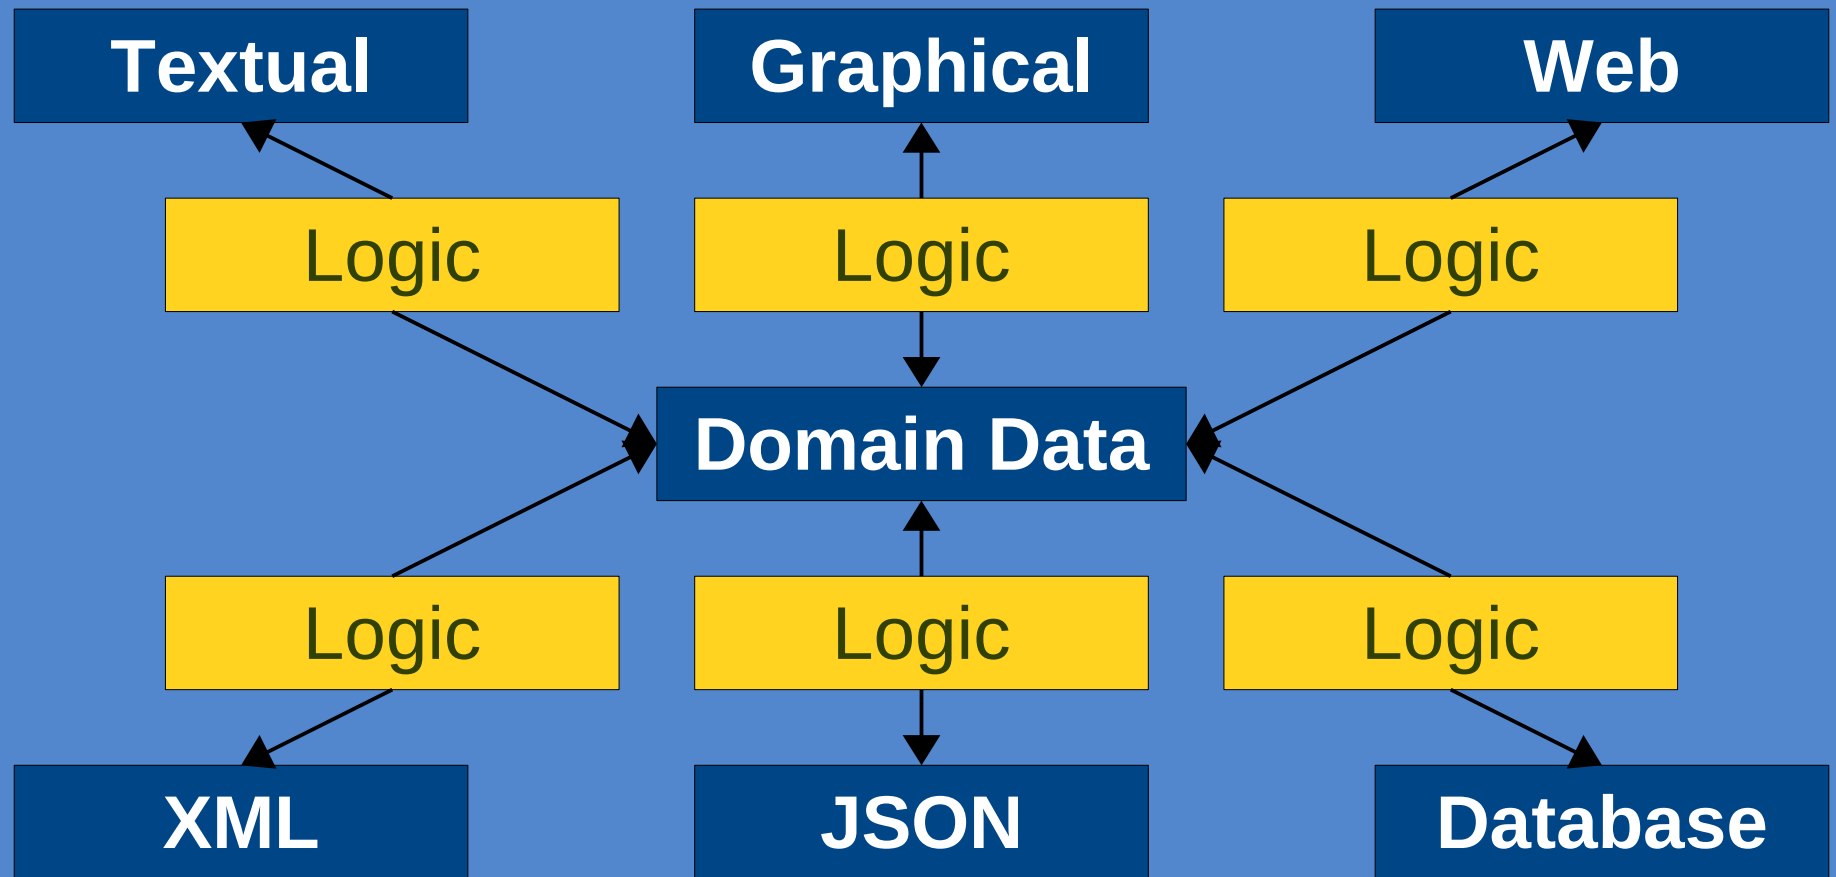

```
<node name="window" channel="file" format="element/part" model="ui/tui/window.cybol">  
  <node name="position" channel="inline" format="number/integer" model="0,0"/>  
  <node name="size" channel="inline" format="number/integer" model="80,15"/>  
  <node name="background" channel="inline" format="colour/terminal" model="green"/>  
  <node name="foreground" channel="inline" format="colour/terminal" model="white"/>  
  <node name="bold" channel="inline" format="logicvalue/boolean" model="true"/>  
  <node name="border" channel="inline" format="text/plain" model="ascii"/>  
</node>
```

Data structure „window“ with properties (space)

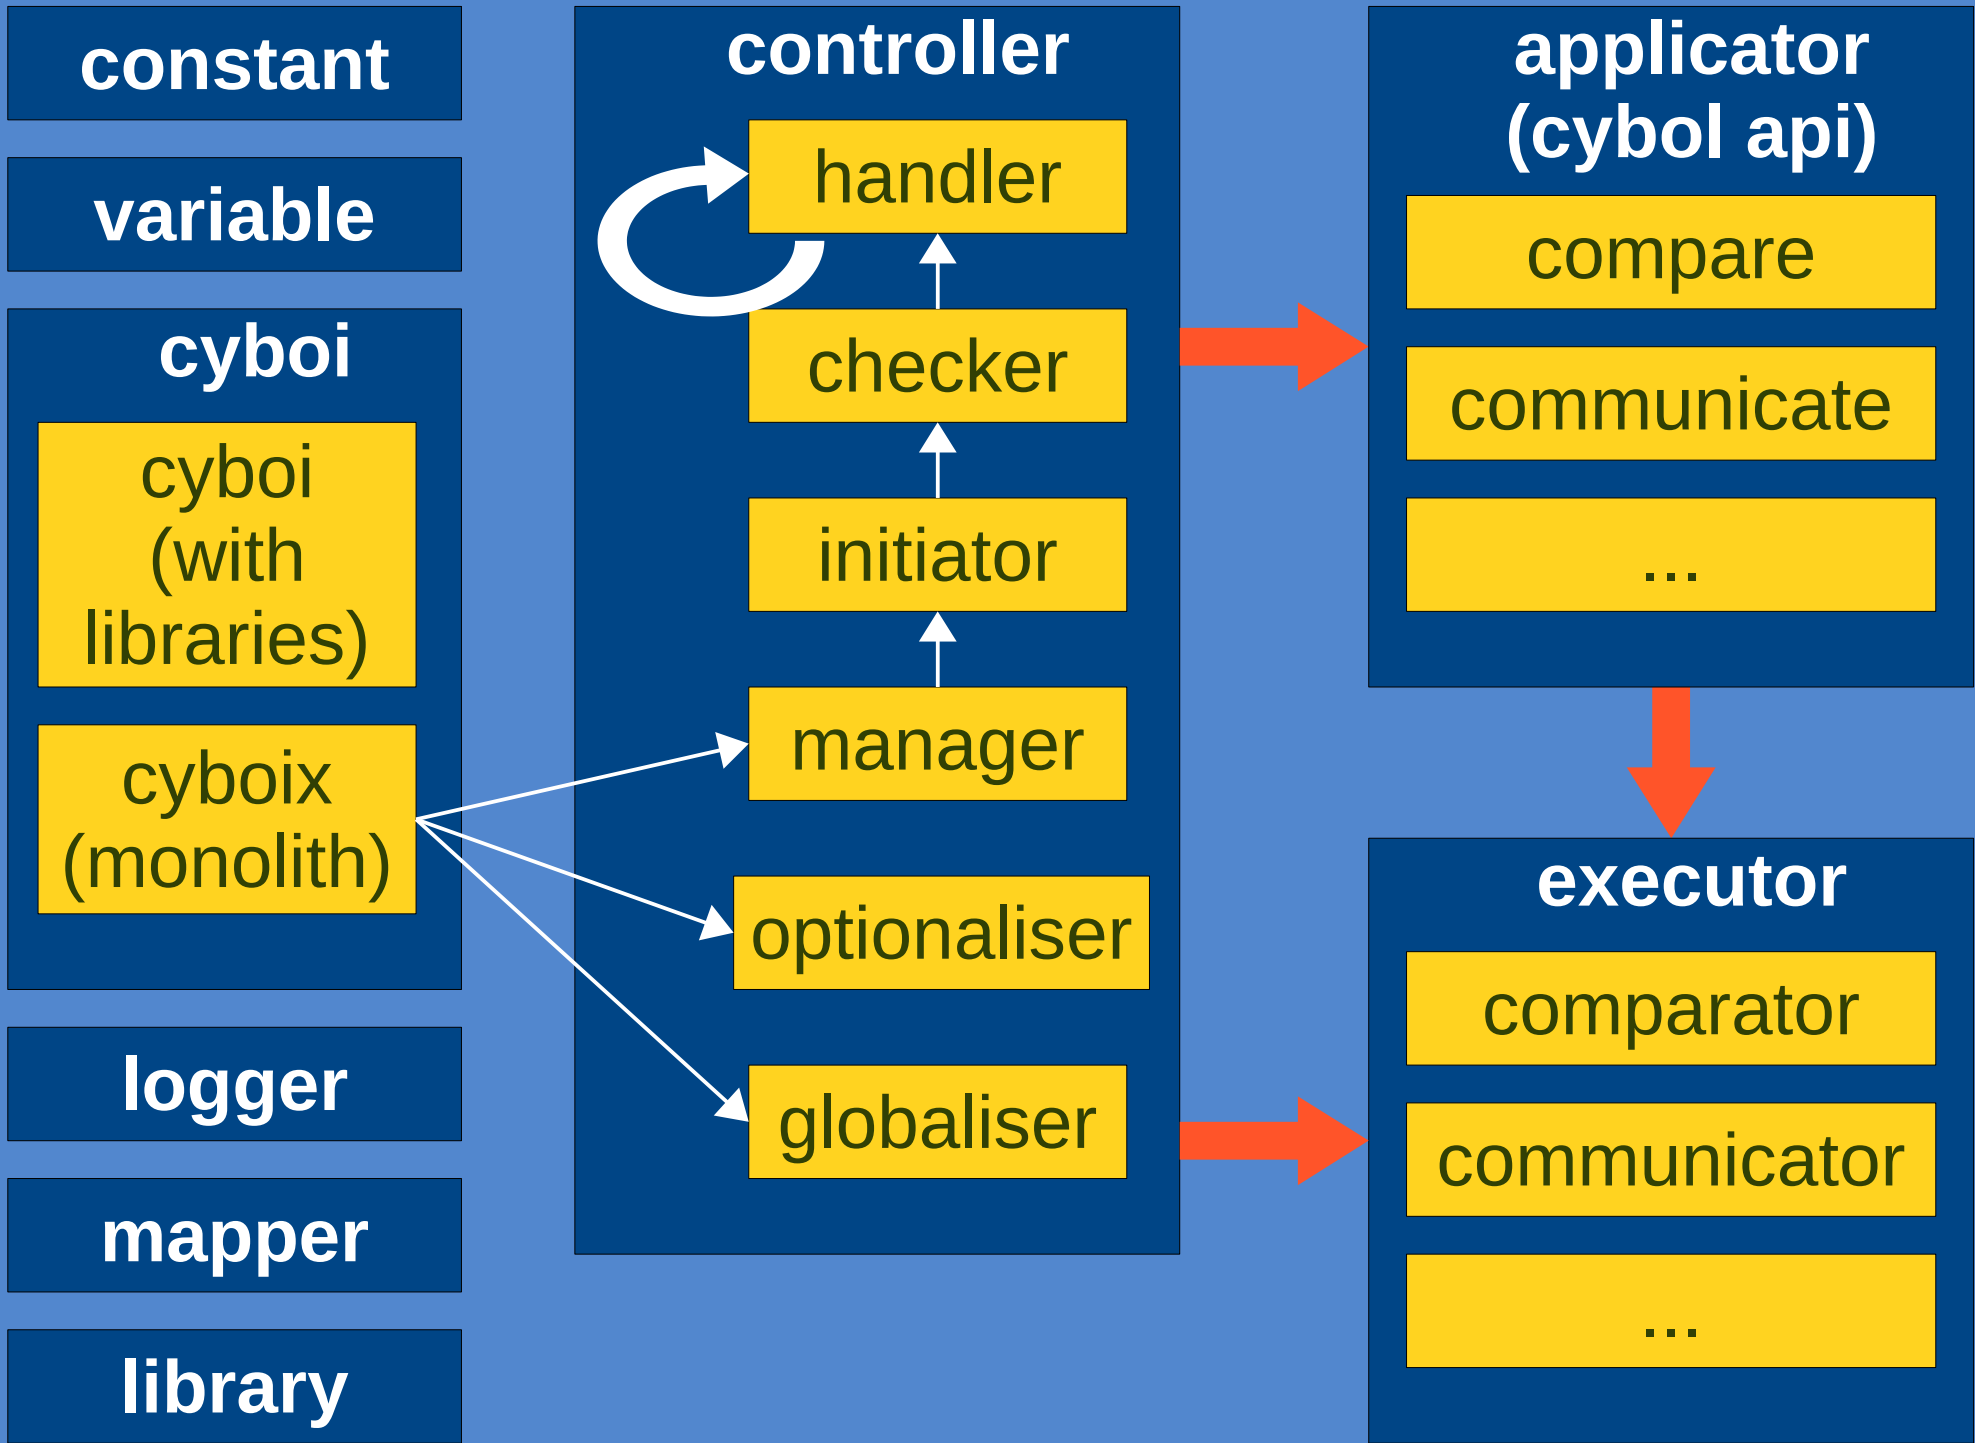

```
<node name="send_tui" channel="inline" format="communicate/send" model="">  
  <node name="channel" channel="inline" format="meta/channel" model="terminal"/>  
  <node name="receiver" channel="inline" format="text/cybol-path" model=".stdout"/>  
  <node name="language" channel="inline" format="meta/language" model="message/tui"/>  
  <node name="format" channel="inline" format="meta/format" model="element/part"/>  
  <node name="message" channel="inline" format="text/cybol-path" model=".window"/>  
  <node name="clear" channel="inline" format="logicvalue/boolean" model="true"/>  
</node>
```

Communication operation „send“ with parametres (time)
